## EDUCATION

---

### University of the Basque Country (UPV/EHU)

Donostia-San Sebastián, Spain

*BSc in Artificial Intelligence*

*2022 – present*

- Four-year research-oriented degree covering Machine Learning, Deep Learning, NLP, Computer Vision, Big Data, Statistics, and Software Engineering
- Final-year thesis on **spatial reasoning in multimodal models**: comparing image-only, text-only and multimodal systems to identify where each modality adds value

### Sapienza Università di Roma

Rome, Italy

*Erasmus Exchange — ACSAI (BSc) & MSc in Artificial Intelligence*

*2025 – 2026 · First semester*

- Took third-year courses from the **ACSAI** (Applied Computer Science and Artificial Intelligence) bachelor's programme alongside graduate-level courses from the **MSc in Artificial Intelligence**
- Coursework included Planning & Reasoning, Visual Analytics, Web & Software Architecture, and Cybersecurity

## PROJECTS

---

### Finding Undervalued Football Players Using Data | *Python, XGBoost, scikit-learn, Streamlit*

2025

- Built an end-to-end ML pipeline to predict players' fair market value from 30+ engineered features — per-90 normalisation, composite role indices, non-linear age curves
- Trained and compared four regression models (Ridge, Random Forest, Gradient Boosting, XGBoost) via 5-fold cross-validation; XGBoost achieved  $R^2 \approx 0.84$
- Scored a *value gap* metric to surface undervalued players and deployed results via an interactive **Streamlit dashboard**
- [github.com/elezgaraiion/sports-analytics](https://github.com/elezgaraiion/sports-analytics)

### Spatial Reasoning in Multimodal Models | *PyTorch, Transformers, Hugging Face, W&B*

2025 – present

- Research thesis comparing image-only, text-only, and multimodal models on spatial reasoning benchmarks
- Evaluating fusion strategies to identify where combining modalities genuinely outperforms unimodal approaches

## TECHNICAL SKILLS

---

**Programming Languages:** Python, SQL, Java

**Machine Learning / AI:** PyTorch, scikit-learn, Transformers, pandas, NumPy, Weights & Biases

**Big Data & Data Engineering:** Apache Spark, Apache Kafka, Hadoop, MongoDB

**Developer Tools:** Git, Docker, Linux, Jupyter, VS Code

## LANGUAGES

---

**Spanish:** Native

**Basque:** Native

**English:** B2
